POPARD

Provincial Outreach Program for Autism and Related Disorders

Introduction to ASD

(click to view full description)

A POPARD and SD61 Joint Presentation

The Introduction to Autism Spectrum Disorders: Practical Applications course provides a comprehensive overview of ASD, with an emphasis on topics relevant to the school setting. These topics include basics of ASD, individual differences, understanding and changing behaviour, social and communication skills, life skills, and much more!

This 5-day, 30-hour, intensive practical course is offered to teachers, paraprofessionals, and other educational staff working at any grade level (K – 12) to support students with ASD in developing their social, academic, and adaptive skills.

Goals of this course include:
Participants are given ample opportunity to participate in practical hands-on activities, and application exercises that will prepare them to apply the concepts and strategies into their instructional program. By the end of this course, participants will be equipped with knowledge about ASD and the tools to support the unique needs of these students.

FREE SUMMER COURSE FOR SD61 EMPLOYEES!
